

Introducing

a life-changing alternative to dentures

by dacia j coffey
and grant zellner

The All-on-Four dental implant technique is a perfect example of the cutting edge resources

Dr. Hopkins uses to give you the incredible smile you've always wanted.

TAKE BACK YOUR SMILE

If you have severely bad teeth or ill-fitting dentures, you face daily challenges. Speaking properly and eating may be difficult, even painful. You may feel embarrassed about the way you look or the way your dentures shift and move. You smile less as you put up with a life of discomfort and poor oral hygiene—not to mention the hassle of messy, sticky denture adhesives and constant denture maintenance.

If you are considering dentures, or if you have dentures that function poorly and cause discomfort, All-on-Four dental implants will change your life.

"I love my natural looking smile!" – Sunny, Actual Patient

All-on-Four dental implants provide a set of permanent, natural-looking teeth that do not slip and move. All-on-Four dentures act and feel like natural teeth.

Imagine getting back your confidence. Picture yourself with a more youthful appearance and a better quality of life!

Just think...no more giving up your favorite foods. No more mouth sores. And, no more taking out your teeth to clean them!

Dr. Hopkins' All-on-Four solution puts your smile back on your face.

YOUR COMFORT AND CONVENIENCE PROMISE

The All-on-Four dental implant technique is a revolutionary denture therapy that allows you to receive a full set of functioning teeth the same day of the procedure, even when extractions are necessary. Four implants provide a rigid and stable structure for attaching your new set of permanent teeth.

Traditional procedures may require bone grafting, which can be expensive and time consuming. With All-on-Four, you get faster healing, less appointments and less discomfort—all while producing absolutely gorgeous results.

WHY DR. HOPKINS?

Dr. Christine Hopkins is one of the preeminent implant and denture specialists in the country.

At the Advance Dental Center, you'll find the most cutting-edge, precision technology

available for diagnosis, education, treatment and cosmetic design, but there is an intuitive artistry behind the modern office. By meticulously planning and designing the type, shape and shade of the teeth that fit you, Dr. Hopkins gives you a gorgeous, sparkling smile. Every day, Dr. Hopkins changes lives by customizing dental plans for each patient in a manner that is completely respectful of his or her life, budget, comfort level and long-term dental health.

As a prosthodontist, Dr. Hopkins graduated with eight prestigious awards from the top dental school in the nation, also earning her certificate in advanced prosthodontics and a Master's of Science in Oral Biology. Only two percent of dentists in the United States have this level of education and experience, and Dr. Hopkins remains at the forefront of her field through extensive continuing education.

For all her skill and experience, there is yet another key layer to the Advanced Dental Center—Dr. Hopkins' genuine concern for you and your comfort. She understands that choosing dentures can be an emotional decision. Dr. Hopkins walks you through your journey with compassion and patience.

"My reward is the smile I see after we have completed the treatments," explained Dr. Hopkins. "Being able to help people feel happier and more confident is the best part of my job."

Show the world a new vibrant and healthy smile by visiting Dr. Hopkins today. 📞
