

Enjoy a dental team truly dedicated to continuous education to provide better care and services for you. Intent on always improving, the Advanced Dental Center team recently attended the 2009 Southwest Dental Conference. You can trust that our expertise is never going to fall behind, as shown by our investment allowing the entire team to attend. Each member of your dental team experienced various courses focused on both clinical and patient services. Read on to learn what each member of Advanced Dental Center studied in order to continue the high level of service we love to offer you.

- Benefit from a dentist who loves to hear. Dr. Hopkins attended a course with advanced dental implant education to better restore and rejuvenate your smile.
- For your financial peace of mind, Kirsten enjoyed taking an insurance course to ensure your dental benefits are always maximized and your dental questions are always answered accurately.
- Your safety is our primary concern. That's why Ani attended an infection control workshop to guarantee Advanced Dental Center always practices the most up to date protection precautions. Ani also participated in the dental assistant round table discussion to learn information about new dental material and technology directly from highly qualified peers.
- To be sure you are as safe, protected and healthy as you are great looking, Kim, one of our talented hygienists, studied oral cancer detection and other common diagnosis of oral lesions.
- Kacey teamed up with Kirsten to learn how to maximize your insurance benefits, saving you unneeded out of pocket payments. She also learned a great deal about designing a natural smile perfectly suited just for you.

Come by Advanced Dental Center soon and experience all the new, expert level knowledge each member of your dental team consistently maintains to serve you best. Our team looks forward to seeing you!
